Question # 50

What is Resizing Images and Size Guide in Adobe Photoshop?

Answer:-

When working with images for a website, you will need to resize your images to suit your particular purpose. Here is a basic guide that can help you decide on what is suitable. (The units used here are pixels, which are standard units across all computer platforms. The conversion between pixels and inches is roughly 1" = 72 pixels or 1cm = 28 pixels) To use this particular unit of measure you will

need to adjust your preference settings by selecting Edit > Preferences > Units and Rulers and changing the units and rulers to measure in pixels.

Type of picture

Size in Pixels

Question # 56

What is a Smart Object in Adobe Photoshop?

Answer:-

Photoshop CS2 introduces a new type of layer called a Smart Object layer. Smart Objects are a little like symbols in Illustrator. Smart objects can consist of pixel-based content or vector-based content, like an Illustrator drawing placed in a Photoshop document. With smart objects, you can make multiple copies of a single object and all copies will be updated when one of the copies is edited ? but you can still apply layer styles and adjustment layers to the individual smart objects without affecting all copies, which provides for a lot of flexibility. Pixel-based smart objects also remember their original size and can be transformed multiple times without loss.
