# Drug Discovery Phd Job Interview Preparation Guide.

## Question # 1

What is your dream job?

### Answer:-

There is almost no good answer to this question, so don't be specific. If you tell the interviewer that the job you're applying for with his/her company is the perfect job you may lose credibility if you don't sound believable (which you probably won't if you're not telling the truth.) If you give the interviewer some other job the interviewer may get concerned that you'll get dissatisfied with the position if you're hired. Again, don't be specific. A good response could be, "A job where my work ethic and abilities are recognized and I can make a meaningful difference to the organization."

## Question # 2

In your last job what kinds of pressure did you encounter and how did you react In Drug Discovery Phd?

### Answer:-

Do not show your fear or uneasiness in handling pressure. Everyone likes to have a worker who can handle pressure calmly and with a clear train of thought. Show how you would logically come to a conclusion in a pressure filled situation.

## Question # 3

What have you done to improve yourself in the last year In Drug Discovery Phd?

### Answer:-

Discuss how you've improved yourself through work experiences, books you've read, classes, club(s) / extracurricular activities and describe the process on how it's happened. For example: I've improved my presentation skills tremendously because I've had to do 2 presentations this year for my communications class.

## Question # 4

Tell me about a time you failed?

### Answer:-

Everyone has failed, so don't play dumb or claim you've never messed up In Drug Discovery Phd. Think of a time when a work-related situation didn't turn out quite as you had hoped. An interviewer is interested in seeing how you took responsibility for your failure, what you learned from it, and how you would prevent similar failures from happening again.

## Question # 5

What relevant work experience do you have in this career field In Drug Discovery Phd?

### Answer:-

Talk about specific work related experience for the position you're interviewing for. Make sure the experience is relevant. Don't talk about previous experience that is not related to the position in question. If you don't have specific career related experience speak about prior experience that has helped you develop the specific knowledge and skills required for the position you are applying for.

## Question # 6

What is your greatest professional achievement?

### Answer:-

Nothing says "hire me" better than a track record of achieving amazing results in past jobs In Drug Discovery Phd, so don't be shy when answering this interview question! A great way to do so is by using the S-T-A-R method: Set up the situation and the task that you were required to complete to provide the interviewer with background context (e.g., "In my last job as a Drug Discovery Phd, it was my role to manage the invoicing process"), but spend the bulk of your time describing what you actually did (the action) and what you achieved (the result). For example, "In one month, I streamlined the process, which saved my group 10 man-hours each month and reduced errors on invoices by 25%."

### **Question # 9**

Do you ever take work home with you?

#### **Answer:-**

Here are two great sample answers that might help get you started:

\* I am an extremely organized person, so I tend to be able to get my work done at work. However, if the need arose I would not be against taking work home. I try not to make it a habit, since I do value my free time. I do realize though that the work we do is important, and sometimes you have to do what needs to be done.

\* I do not shy away from taking work home with me. I know that meeting deadlines and doing outstanding work sometimes means taking a bit of it home. I do not have a problem doing that when the need arises.

\* Make sure to give an honest answer. Lying about taking work home may turn out badly for you if it is required and you do not do it.

### **Question # 12**

What are your strengths In Drug Discovery Phd?

#### **Answer:-**

This is one of the most common questions you will be asked. Give an answer relevant to the skills and qualities relevant to the position you are applying to. The interviewer is trying to find if your strengths match the job. For example, if you are applying for a job In Drug Discovery Phd where accuracy is an important issue, one of your strengths could be that you have an eye for detail. It may be useful to find different words to describe similar attributes and qualities in order to avoid repetition.

### **Question # 43**

Why are manhole covers round?

#### **Answer:-**

This is a classic brainteaser, which was reportedly first asked by a Microsoft interviewer. Here's how to ""solve"" this brainteaser (remember to speak and reason out loud while solving this brainteaser): Why are manhole covers round? Could there be a structural reason? Why aren't manhole covers square? It would make it harder to fit with a cover. You'd have to rotate it exactly the right way.

The pipes below are also round, so fitting them might be easier, as might be making them. So many manhole covers are round because they don't need to be rotated. There are no corners to deal with. Also, a round manhole cover won't fall into a hole because it was rotated the wrong way, so it's safer. Looking at this, it seems corners are a problem. You can't cut yourself on a round manhole cover. And because it's round, it can be more easily transported. One person can roll it.

### **Question # 46**

What will your ramp time be before you become a meaningful contributor?

#### **Answer:-**

Companies want staff that can ramp quickly, but also want people who are realistic. So take into consideration how intense the job is and then give a good answer. For example, if you have simple responsibilities that don't require a huge development curve, then your ramp time will probably be shorter. If it's a complex set of skills that you need to develop, then your ramp time could be longer - the key is you have to explain why you believe that ramp time should be.

### **Question # 55**

What are your salary expectations In Drug Discovery Phd?

#### **Answer:-**

This question is like a loaded gun, tricky and dangerous if you're not sure what you are doing. It's not uncommon for people to end up talking salary before really selling their skills, but knowledge is power as this is a negotiation after all. Again, this is an area where doing your research will be helpful as you will have an understanding of average salary.

One approach is asking the interviewer about the salary range, but to avoid the question entirely, you can respond that money isn't a key factor and you're goal is to advance in your career. However, if you have a minimum figure in mind and you believe you're able to get it, you may find it worth trying.

### **Question # 57**

Are you planning to continue your studies and training In Drug Discovery Phd?

#### **Answer:-**

If asked about plans for continued education, companies typically look for applicants to tie independent goals with the aims of the employer. Interviewers consistently want to see motivation to learn and improve. Continuing education shows such desires, especially when potentials display interests in academia potentially benefiting the company.

Answering in terms of "I plan on continuing my studies in the technology field," when offered a question from a technology firm makes sense. Tailor answers about continued studies specific to desired job fields. Show interest in the industry and a desire to work long-term in said industry. Keep answers short and to the point, avoiding diatribes causing candidates to appear insincere.

### **Question # 58**

How many square feet of pizza are eaten in the United States each month?

#### **Answer:-**

This is a classic guesstimate question where you need to think aloud. And so first off you round the U.S. population to 300 million people (it's actually about 315 million but rounding will be much easier and your interviewer will not score you lower for rounding). Then estimate how many people eat pizza. A decent educated guess is two out of every three people, or 200 million. Now let's say the average pizza-eating person eats pizza twice a month, and eats two slices at a time. That's four slices a month. If the average slice of pizza is perhaps six inches at the base and 10 inches long, then the slice is 30 square inches of pizza. So, four pizza slices would be 120 square inches (30 times 4).

Since one square foot equals 144 square inches (12 times 12), let's assume that each person who eats pizza eats one square foot per month. Since there are 200 million pizza-eating Americans, 200 million square feet of pizza are consumed in the U.S. each month. To summarize: 300 million people in America, 200 million eat pizza, average slice of pizza is six inches at the base and 10 inches long or 30 square inches, average American eats four slices of pizza a month, four pieces times 30 square inches equals 120 square inches (one square foot is 144 square inches), so let's assume one square foot per person, and thus one square foot times 200 million people equals 200 million square feet of pizza a month.

**Question # 67**

If you had to choose one, would you consider yourself a big-picture person or a detail-oriented person?

**Answer:-**

Both are important. You need to stress that. However, if you could only choose one, ask yourself In Drug Discovery Phd - do you like to be "in the weeds" with your work, or do you want to be the one painting the vision?

**Question # 68**

What do you know about the company?

**Answer:-**

Any candidate can read and regurgitate the company's "About" page. So, when interviewers ask this, they aren't necessarily trying to gauge whether you understand the mission-they want to know whether you care about it. Start with one line that shows you understand the company's goals, using a couple key words and phrases from the website, but then go on to make it personal. Say, "I'm personally drawn to this mission because..." or "I really believe in this approach because..." and share a personal example or two.
