Read More Answers.

Question # 3
What is use of derived roles and where it is used?
Answer:-
Derived roles are also called as Child Roles and Master
Roles are called as Parent Roles.
Derived Roles refers to the roles that already exist. As
name indicates Derived roles are derived from other role
(Master Role).
Derived ROles inherits the menu structure and functions
included (transactions, reports, Weblinks and so on) from
the role referenced.
The default authorization values of the derived role are
that of the inherited role. The Org Levels are to be
maintained in the derived Role.
